Hemorrhoid Banding

Areas Examined & Treated	
Areas	• Anus • Rectum

The Procedure	
Hemorrhoid Band Ligation	
Therapeutic	• Band ligation, or banding, is an in-office procedure performed by a doctor to treat internal hemorrhoids • Much less invasive than hemorrhoidectomy surgery, it is a simple process that can be performed in a doctor's office in just minutes with little discomfort • Most patients return to work the same day • All patients will require 3 sessions • There will be a 2 week interval between sessions • Occasionally there will be a 4th session that may be required
